

# IRON COUNTY RECORD.

Vol. 16.

Cedar City, Iron County, Utah, Friday Oct. 8, 1909.

No. 44

## Cedar City and Vicinity.

Mrs. Albert DeLong of Panguitch is here visiting with her parents Mr. and Mrs. N. W. Pryor.

Miss Belle Williams, who was employed in Dr. Robinson's office last winter, is at her old post again.

Eye glasses to fit all eyes. For old and young. Best styles and quality, and at prices you can afford.  
**PALACE DRUG STORE.**

Already several girls have handed in their guesses as to who will be mayor next term. Send in your guesses, girls, you have a chance of getting a dollar.

If there is more than one correct guess as to whom will be our next mayor, the prize will go to the first one handed in. So be among the first to get your guesses in.

The girls who have sent in guesses on the future mayor know who are good men for the office. Maybe it would be a good idea to let them choose the entire ticket of city officials.

An invitation is extended by both of the wards to the students to attend Sunday School. It will be a pleasure to see them in attendance. Every courtesy will be extended to them.

A sheep owner informed the Record that over 75,000 head of sheep had been sold this fall in Iron County. The prices were fair and the sheep disposed of were in excellent condition.

When you want eye glasses go to the Palace Drug Store. You will find all sizes and styles and at prices within your reach. Tests can be made of your eyes and glasses secured to fit exactly.

The Hamiltons of Fort people have purchased an organ for their Sunday School and amusement purposes. This is an improvement which has been needed for a long time and we assure the people will appreciate it now they have it.

If each wood hauler in the city would make it a point to haul one load to the poor they would have sufficient to last them through the winter months. Some one lead out and the others will follow. A load of wood given to the poor will never be missed and the giver will feel that he has done a good deed.

Enquiries have already been made of sheep owners whether or not they are willing to contract next spring's wool crop for 18 cents per pound. So far as is known none have contracted. The wool and sheep industry is in a flourishing condition this year and promises to continue so for the coming year.

### Change at Tithing Office.

On account of Wm. R. Palmer accepting a position in the Cedar Mercantile store a change has been made in the management of the Tithing office. In the future, and until other arrangements can be made Bishop H. W. Lunt will attend to the tithing affairs of both wards.

### Gymnasium.

Information is had that the free gymnasium for the city will be established at the Branch Normal till the Ward Hall can build an addition to the main building.

This will be a good move for the young men, and also young ladies, for the reason that they will have some place to go during the long winter evenings. They will be under a refining influence and will receive untold benefit from the gymnasium work.

Wednesday morning James Tweedie left for Kansas City, Mo., where he will attend the American Royal Live Stock show. Mr. Tweedie makes this trip for the purpose of getting some pointers on horses. He is interested in pure bred animals and takes a delight in handling them whenever possible. He will remain for a short time studying the different breeds and make an effort to become acquainted in all matters pertaining to the handling and raising of pure bred animals.

Try and get a council this time at which you will have no kick.

Less than a month before city election. Have you picked out your men?

Get your tax money ready. It will soon be Nov. 15, and taxes will then be delinquent.

For the Lord's sake you kickers, if you must kick do it at the editor. He is used to it.

The Cedar City Drug Store will soon begin the sale of mild non-intoxicating hot drinks.

Branch Normal students who wish drawing paper will be able to secure it at the Record Office next week.

Fix the foot bridges before snow falls. It will make pedestrianism much more pleasant during the winter.

Cedar is now in a position to demand the services of a professional nurse. How would it be to import one.

Winter is in full force soon and it will be a good thing to have plenty of fuel on hand. Better see to it now.

How would it be for the city to lay pavement across the streets. It would be a most convenient thing during muddy weather.

Over 21,000 bushels of grain has been threshed up to date and about 10,000 more to be threshed. A pretty fair yield for this locality.

The Old Reliable Co. op. is preparing to lay pavement in front of its place of business. This will then extend the pavement already laid nearly to the post office.

The district school has fully as large an attendance as was had last year. A splendid corps of teachers has been secured and everything is running smoothly.

Don't forget that election is near at hand. Think over whom you would like to have for officers and when the primaries are held be in attendance and nominate them.

### For Sale Cheap.

Fall blood Jersey bull calf one month old. Make one and one half pounds of better per day from his mother. Inquire of S. J. Foster.

Robert A. Thorley and Wilford Cox have gone to Chicago to attend a dental college. They will complete the course this winter. Mr. Thorley was accompanied by his wife and babe.

Cattle are coming from the mountains very rapidly these days. It is getting rather cold for them at night up there, so they conclude it is the better part of valor to hunt warmer climates.

Cedar sent up a fair quota of visitors to the semi annual conference and State fair. Among those who may be mentioned are Mr. and Mrs. Uriah Jones, Mr. and Mrs. E. M. Corry, Mr. and Mrs. L. W. Jones, Mr. and Mrs. M. D. Higbee, Harry Lunt and Mrs. T. D. Roche.

Our readers will notice the advertisement of the Urie & Urie butcher shop. This firm has been long established and has always given its patrons the best meat obtainable. It caters to outside trade and guarantees satisfaction and promptness in delivery. The manager, Geo. K. Urie, states that grain of all kinds will be taken on account.

During the Indian Summer that will be upon us soon will be a good time to clear some of our arid land and prepare it for cropping. Let all farmers clear a few acres each and the whole will make a large acreage of land that cannot be beat for raising wheat, corn and potatoes. Farmers, make an effort this fall and try it. You will not lose anything.

Prin. Geo. W. Decker is a visitor at the metropolis this week. He is up on business, but will attempt to get some pleasure as well.

The Palace Drug Store anticipates making additions to their premises next season. The company will at least double their present floor space.

Bonds and liens in paper always give satisfaction. Come and get some and try it. Can cut it to any size you wish.  
**THE RECORD.**

Cheap, trashy note books never give satisfaction. Come to the Record office and get the best paper manufactured. 10 different kinds to choose from.

Coal miners are now pushed to the limit, and after a week or two they will be unable to meet the demand. It would be a good idea to get more miners at work so the public can be served before snow flies.

It is to be hoped that not one citizen of Iron County will have the humiliation of seeing their name appear in print as a delinquent tax payer. Get your money ready now, and fool the printer out of a job.

David Webster is the agent for a sickness and accident indemnity company. Several of the members of his company who live here have received nice little sums of money because of being incapacitated by illness.

The Record subscription list is steadily increasing these days, which is encouraging. No doubt the cause is the tremendous kicking that some few have been making. If that is true, keep the good work going.

Rumors are current that Wm. R. Palmer has accepted a position in the Cedar Mercantile and Live Stock Company store. If this be true they have secured an efficient man and one who can be relied upon.

The people have been busy gathering in the winter apples this week. The freezing weather will soon be here and they are anxious that the apples be gathered before nipped with frost.

A very pleasant social was given last evening by Mrs. J. H. Hunter in honor of her son Roland's birthday. A few of his most intimate friends were present and report having enjoyed the evening immensely.

Since the return of the Branch Normal students business is far brisker than during the summer months. Our merchants are kept busy attending to their wants, and their trade makes receipts considerably larger.

The government has opened for entry in Iron County something over 260,000 acres of land. Those who are contemplating taking up land will do well to investigate before the best of it is taken. Any land attorney can give information.

Clarence E. Jones, who returned from a mission to California a short time ago, is now in Raymond, Alberta, Canada. He has accepted a position in the Knight Sugar factory at that place and will remain there while the factory is in operation.

Tuesday John M. Higbee left for Independence, Missouri. He received a telephone from Elder McRay of that place asking him to come at once in order that some business might be attended to in which both are heavily interested.

One reader told the reporter to give the readers more locals. Where the hell will we get them from? If some one will put us onto a few now and again, publication will be given them simply to satisfy that one reader.

It is reported that since the new machinery has been placed in the roller mill there is a lack of power. The company had better pipe the water from the head of the canal and thus increase their power one half, at least.

Brickmakers should spend the time during this winter that they are unable to work in getting out sufficient fuel for next season's run. They would then not be handicapped for lack of fuel just when ready to fire the kiln.

## Clean up and be Healthy.

The recent visits of the Board of Health to some of those who have Typhoid is but the beginning of a reform along the line of cleanliness and sanitation which will work wonders, we hope, with our community and town. No citizen would wish to shirk any responsibility connected with the subject about to be discussed, and hence we take it that there will be such a spirit of co operation in this respect that ideal conditions will exist about every house and lot in our city.

And now to the point. Let us all join together and appoint a general day for "cleaning up." Sunday evening when the Betterment League meets the time could be decided upon.

The house, lot, corral, privy and pigsty could all be gone over and given a good, thorough, foundation cleaning, those will barrels could be taken out from the back yard and the thousands of flies would thus escape the kitchen, the pantry and the dining room.

If some of the accumulated manure in the barn yards could be hauled out to the fields the earth about the stables would once more have the chance of sunshine and light, and next year we would not have any manure heaps for the breeding of flies. And while cleaning the privy, remodel it if not up-to-date. The excreta should be so enclosed that the flies would not have access to the same, thus preventing a breeding place for them. The most hygienic way to arrange the privy is to build a brick vault to receive the excreta as long as is necessary and just wide enough to admit a shovel blade easily, this should be walled up tightly with the boards forming the sides of the out building, and a small door left at the end which is kept shut to exclude the flies, only when cleaning day comes around. The excreta should be covered by dry earth, lime or ashes, and in so doing the flies cannot have access to the dejecta as a breeding place.

So many of our neighbors complain of the foul smelling privy next door, but this will not happen again if we clean ours out every month and observe the above suggestions in caring for the same. A most unsanitary condition exists with some of our outhouses in having them built upon the stream passing through the lots, several such have been reported, and the owners should see that they are removed, and in placing them elsewhere, see that they are not nearer the street or the neighbors house than 50 feet.

If all such could be included in our "clean up and keep clean" ideas, complaints would rarely come to the Health Officers.

Do not make it necessary for the Marshal to give you a call and suggest that your swill and slops be moved from the back porch to the corral, or that the odor emanating from your outhouse or barn is so foul that it will be declared a nuisance if you do not take steps to CLEAN UP.

Let us all join the procession and keep in mind some of the articles of our ordinances such as the following, which closely connect last week's article with this:

"It shall be the duty of any person having charge of a person affected with Typhoid Fever to disinfect all excreta excreted by the said person during the course of the disease, in accordance with the rules of the state board of health, and upon failure to do so shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine in any sum not exceeding two hundred dollars."

It shall be the duty of the physician in attendance upon all persons affected with Typhoid fever to personally instruct those having charge of same to perform the disinfection described in this section and to satisfy himself that the same is carried out, and for failure to do so he shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine in any sum not exceeding two hundred dollars."

The following ordinance is applicable to some:

"If any person causes or permits, within the city limits, any unclean, stinking, foul, defective, or filthy drain, tank, or gutter, or any leaking or broken sloop, garbage or manure box or receptacle of similar character, to remain on his premises, the same shall be deemed a nuisance."

"Whenever any stable, stall or apartment, or any yard or appurtenance thereof, in which any horse, cow or swine, or other animals shall be kept, or in any place within the limits of this city in which manure or liquid discharges of such animals shall collect or accumulate, and when such stable, stall, shed, or apartment, or any yard or appurtenance thereof, is not kept in a cleanly and wholesome condition, so that no offensive smell shall be allowed to escape therefrom, the same shall be deemed a nuisance, provided, that nothing in this section shall be construed as to include manure deposits upon any private property for the purpose of cultivating or fertilizing the same, and the same is kept in an innocuous condition."

If, after all has been done to help us along the path of sanitation and cleanliness, there be some who are still slothful and disregarding, then let those who know of such conditions make WRITTEN COMPLAINTS to the Health officials, and any and all such charges will be carefully investigated by them.

### Notice of Republican Primary.

Saturday, Oct. 16, 1909 the Republican Party of Cedar City will hold a primary in the City Hall, commencing at 7:30 p. m., for the purpose of placing in nomination candidates for city office to be voted for on Nov. 2, 1909, as follows:

Mayor  
Four Councilmen  
Recorder  
Treasurer  
Justices of the Peace  
Six directors of the public library and gymnasium board.  
J. S. WOODBURY,  
City Chairman.  
HERBERT HAIGHT,  
Secretary.

### Town Clock Installed.

The town clock has at last been put in position and is now running. It makes quite an improvement to the tabernacle tower and closes the unsightly gaps that were so prominent before and which reminded one of the empty eye sockets of a skeleton. When a few coats of paint have been added to the tower it will be a thing of beauty and will enhance the looks of the tabernacle.

The clock will be a great convenience to the people for everyone can now have the same time which will obviate much of this tardiness that is so prevalent in Cedar.

When once the clock is thoroughly regulated set your clocks and watches by it and let us all have the same time.

### The Corry Hotel.

Since the Corry hotel was burned out it has undergone a complete transformation in the matter of remodeling, papering and painting. It has been open for business for some little time, and the proprietor is better prepared than ever to accommodate the traveling public. As the service given in the past was all that could be desired the patrons now need have no fear but that the same estimable service will be accorded them. The Corry hotel has always had the name of being the most homelike place in the south and still holds the reputation.

### Betterment League.

Last Sunday at the Ward Hall the Parents' Classes of the two wards met and talked over the work to be taken up by this league. Also appointed a committee of eight members to take charge and work to the end that conditions in Cedar, both moral and sanitary, may be enhanced. Anything that may be of benefit to the city will be taken hold of and the best possible done for the advancement of the town. The committee mentioned is composed of the following persons: Jos. S. Fife, chairman, Richard A. Thorley, Mrs. Rose Lunt, Wm. H. Leigh, Nellie Pace, Thos. Lawrence, Mrs. Mary J. Williams and Ada R. Leigh.
